## **Concept statement**

WantedDesign Interiors 2020 will be located with ICFF at the Javits Center in Manhattan, NY. Designed to create an atmosphere that highly meets the exhibition culture, brand style and the concept of WantedDesign. It is a creative space full of passionate and concise feelings that would increase the connection between the audience and the exhibitors. New and innovative solutions will set this experience space apart from others.

## Proposal statement

After a long indoor visit, the audience was visually exhausted and their thoughts are as dry as the desert. At this time, the cafe **MOONLIGHT** appears in front of the audience like a piece of pure land in the desert, the cold moonlight soothes people's restless hearts, providing a charging station that can slow down and inject new energy. Design elements include arches and circle, which represent harbors and the shape of moon. All the elements symbolized life and the perspective of the future.

## Bio brief

---

**Yueran Yin**, from China,  
is excited to experience  
**WantedDesign2020** with  
people who share the  
same passion and goals.

## Credits

The MOONLIGHT is based on my original concept from the first step of the WantedDesign 2020, and combined with the recycled cardboard tubes and tubes of shaw desert lights carpet collection come from my classmates' ideation. I would like to give credit to my professor Mary Golden, WantedDesign Team, and the entire class. It 's everyone 's effort to make this project more complete and impressive.
