Experiential Learning Options - College of Art and Design

Experiential education has been a part of RIT’s tradition of a career-focused education. It gives students the opportunity to apply knowledge and skills learned in the classroom to real-world experiences apart from their academic environment. This valuable experience builds on their educational foundation, at the same time, confirming and clarifying career goals. In the College of Art and Design there are several options for experiential education. Cooperative Education (co-op) and Internships are the most common.

What is Co-op?

Co-op or cooperative education is typically full-time, paid employment directly related to a student’s major, one or two consecutive semesters/terms. (Fall semester, spring semester, or summer term). Start and end dates must coincide with RIT’s recommended co-op work schedule. A co-op is a type of experiential education that allows students to gain valuable experience that helps clarify career goals, hone skills, and at the same time earn a salary. A co-op student’s level of work responsibilities often are equal to an entry level employee’s work responsibilities. Students register for co-op just like they would a course and it will appear on their transcript with a Satisfactory or Unsatisfactory grade. Students are not charged tuition for co-op.

Who Can Co-op In the College of Art and Design?

Eligibility

**Undergraduate Students** must be in good academic standing with a minimum of a 2.0 GPA and have completed their sophomore year. Students are not eligible for co-op after they have completed all their degree requirements.

**Graduate** must be in good academic standing with a minimum of a 3.0 GPA and have completed one academic year. Students are not eligible for co-op after they have completed all their degree requirements. Total work
blocks of co-op should not exceed 2 semesters/terms. Any exceptions, for special circumstances, need departmental approval.

### What is an Internship?

An internship course exposes students to the professional environment through outside job opportunities with an acceptable organization/agency/company in their field. Students will work under the guidance of a manager (ex.: artist, art director, creative director, senior graphic designer, product development manager or marketing communications manager) and perform work that is educational and meaningful for their short-term academic goals as well as their long-range career preparation.

Documentation of the experience is required and a final review is obtained from the employer. Students must obtain pre-approval from their faculty advisor by completing the Internship Approval Form. The appointed faculty advisor will meet with the student upon completion for final evaluation and grade. Credit earned is typically applied towards elective credits.

### Co-op vs. Internship – What is the Difference?

Internship experiences can vary as far as hours, level of work and responsibilities. From an employer point of view there often is no difference, but it is often important for an employer that the experience is tied to a student’s academic record. As long as a job meets the definition of co-op or internship at RIT it does not matter what the employer calls the position.

Academic credit (which incurs tuition charges) is the main difference between co-op and internship. Based on a student’s circumstances, if they need academic credit, then they may choose to register the experience as an internship. If they do not need academic credit, then they may choose to register for co-op, which is tuition-free.

If a student registers for an internship for a particular semester, the internship must occur during that same semester. Credit can only be awarded for an internship during the semester/term in which the work experience occurs.

A student’s career services coordinator in Office of Career Services & Co-op is available as a resource to help them work through the options.

### Information for International Students

#### Curricular Practical Training (“CPT”)

Work experiences which are an integral part of an academic program are considered "curricular practical training." These experiences may include alternate work/study programs, internships, cooperative education, and practicum experiences. To be eligible for CPT, students must receive course credit or be in a recognized co-op program.

International students interested in participating in Curricular Practical Training should make an appointment to see an ISS advisor. Start and end dates must coincide with RIT's recommended co-op work schedule. Also, keep in mind that a co-op work term(s) cannot extend into the next semester -- past RIT's add/drop deadlines.

To apply for Curricular Practical Training, international students are required to do the following:

1. **Register** for co-op or internship with their academic advisor in SIS.
2. **Report** their employment information to the Office of Career Services and Cooperative Education online.
3. **Get CPT Authorization.** After completing step 1 and 2, **permission** to participate in curricular practical training must be granted by International Student Services, prior to the employment start date. Students
must provide ISS (in person or via email) a copy of their job offer letter/email, and will receive a new SEVIS I-20 with CPT Authorization.
